

Farm & Agricultural Safety General Checklist

Inspected on _____ By _____

Location _____

Do a safety walk-around monthly. Look for:

- Moving equipment/parts/processes/people that could result in collision, compression or impact.
- Objects that can fall or drop from above.
- Chemicals or potentially harmful dusts, mists or fumes that can be inhaled.
- Rolling or pinching objects or machinery processes that could crush body parts, catch hair, or snag loose clothing.
- Electrical hazards from equipment, wiring or utilities.
- Presence or use of sharp objects that could cut or pierce the body.
- Hot or cold surfaces that could cause burns or freezing.
- Fire and eye hazards from welding, cutting, brazing, lasers or other sources.
- Any tools or equipment that can generate flying debris, harmful dusts, vibration, repetitive motion, or noise.
- Processes involving mixing or pouring of hazardous chemicals.
- Work areas that may create hazardous conditions, such as chemical storage near electrical panels.
- Material handling involving pushing, pulling, or lifting on a regular basis.
- Loud noises that could affect hearing.
- Hazards from handling fuels, cleaners, pesticides, herbicides, fungicides.
- Tasks that can amputate, crush, pinch, puncture or otherwise injure hands, arms, legs or feet.
- Working surfaces that can be slippery or wet.

When you identify hazards, use the hierarchy of controls to reduce the risk of injury, illness or death. Scan the QR code for more information.

The Farm & Agricultural Safety Training program was produced under grant number SH-39188-SH2 from the Occupational Safety & Health Administration, U.S. Department of Labor. It does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. government.
